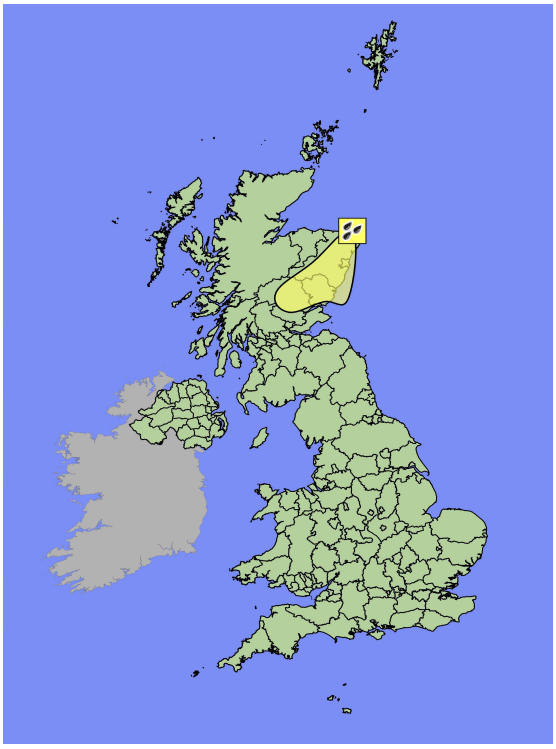
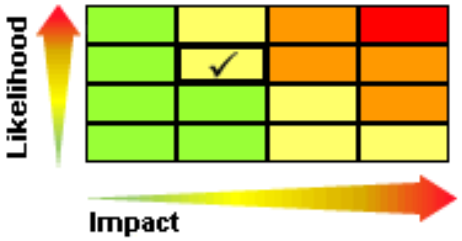
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of rain will become slow moving over the area as a depression takes up a central position of the UK. Fairly strong, easterly flow will allow totals of locally more then 40 mm to build up, especially over higher ground.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **15:00 on Thu, 21st Jun 2012** until **12:00 on Fri, 22nd Jun 2012**

Outbreaks of rain will spread north during Thursday afternoon and evening. The rain will be persistent and heavy at times and accompanied by a strong southeasterly wind. The rain is expected to gradually become lighter through Friday. The public should be aware of standing water and spray on roads and the possibility of localised flooding.
